

Keep your data moving.

The ThirdPartyTrust third party risk management automation tool integrates with Netskope to supercharge risk monitoring into the far reaches of your network, tracking vendors and their users across business areas. Everything from data-enhanced questionnaires to tracking shadow IT actions is now at your fingertips.

Discover unknown vendors with access to your network

Company	Users	Uploaded Data	Downloaded Data	Connections	Use	Actions
Atlassian	25	15000 MB	15000 MB	3	1h 40m	+ Monitor, Ignore
Slack	90	10000 MB	10000 MB	5	2h 10m	+ Monitor, Ignore
Adobe	30	12000 MB	20000 MB	2	4h 25m	+ Monitor, Ignore
Microsoft	45	15000 MB	-	8	7h 15m	+ Monitor, Ignore
Google	60	20000 MB	10000 MB	1	8h 35m	+ Monitor, Ignore

Automate a real-time enforcement of your TPRM process

Add them to your actively monitored vendor inventory

Intelligence Driven Third Party Risk Management

Enhance controls and visibility

Gain an inside-out perspective to scale the oversight of your digital supply chain growth.

Break the security data silo

Create a rich data bridge between Security and GRC teams to work on actionable findings.

Extend the reach of your network

Solve shadow IT by detecting which applications are being used and by how many users.
